Website: https://isabellauhniat.github.io/Homework3/

I created my website using multiple styling and customization tools. I utilized margins, padding, borders, color, font styles and more. Creating IDs for the main body and contact information made style those much easier. For my paragraphs, I added a white background with a box shadow. This makes the paragraphs much easier to read and pop off the blue page. I decided on using the font 'Georgia' for main bodies with a large font size as it was easy to read and looks very organized. I also created an intro id that is differently styles. In cursive and without background, a few words are bolded and underlined for emphasis.

The headers and subtitles all have the same font that are centered and bolded for easy and clear understanding. The header on the second page is smaller than on the first but larger than the main body. I created a navigation bar as well for easy access to the Home page, About page, and Contact Information. This bar is right under the title and subtitle and makes for simple navigation through pages. Both images that I included have borders that make the images look more a part of the page. The image on the first page was centered while on the second, I placed it side by side to an ordered list.

Lastly, the contact information is placed conveniently on the bottom of both pages. There is border only on top to separate it from the rest of the information. Both email and LinkedIn are hyperlinked under the header, 'Contact Information.' The design is very simple yet clean and easy to access.
